SKILLS

Languages:	C++, Java, C, Python, Java Script, Bash/Shell Scripting
Frameworks:	HTML CSS, COBIT, Metasploit, React.js
Tools/Platforms:	MySQL, Wireshark, Nmap, Burp Suite, Linux, AWS
Soft Skills:	Problem-Solving, Critical Thinking, Adaptability, Collaboration, Teamwork

PROJECTS

Caesar Cipher Encryption/Decryption | HTML, CSS, JavaScript, Cryptography Nov'24

- Engineered a browser-based Caesar Cipher encryption and decryption application leveraging HTML, CSS, and JavaScript for interactive cryptography demonstrations.
- Implemented customizable shift-key algorithms with modular arithmetic to accurately encode and decode text in real time.
- Designed an intuitive, responsive UI that allows users to input plaintext or ciphertext and instantly view transformed output.
- Optimized JavaScript logic for efficient string manipulation, ensuring smooth performance across desktop and mobile browsers.
- Applied foundational cryptography principles to enhance understanding of classical ciphers and secure communication techniques.

BankEase- Easy and Secure Banking | Java (Core java, Java Swing/AWT), MySQL, JDBC, Github Aug' 25

- Developed a full-featured banking application to manage customer accounts, transactions, and account details with real-time database integration.
- Implemented core functionalities including account creation, deposit/withdrawal, balance inquiry, and transaction history.
- Designed an interactive and user-friendly GUI using Java Swing for seamless user experience.
- Integrated MySQL database for secure and efficient storage of customer and transaction data.
- Ensured robust error handling and validation to maintain data accuracy and prevent unauthorized access.

Basic Network Scanner | Python, Scapy, Socket, ARP, TCP Scanning Aug ,25

- Built a Python-based network & port scanner for ethical penetration testing and subnet monitoring.
- Implemented ARP-based host discovery and TCP port scanning with customizable ranges.
- Added CSV/JSON export and color-coded CLI interface using the rich library for better reporting.
- Utilized Scapy and Socket for network reconnaissance and real-time scan execution.
- Deployed and showcased the project on GitHub with professional documentation.

CERTIFICATES

Core And Advance Java Board & Infinity	Jul, 24
Ethical hacking & Digital forensic Coursera	Nov, 24
Generative AI with Large Language Models, mastering AI concepts and practical use cases Coursera	Jul'24

ACHIEVEMENTS CO- CURRICULAR ACTIVITIES

- Solved more than 200+ competitive questions on [GfGs](#), [leetcode](#) and [CodeForces](#)
- Attended specialized workshops on AWS Cloud and Cybersecurity, gaining practical insights into cloud infrastructure and security practices.
- Secured a Top 10 rank in an intra-college coding competition, demonstrating problem-solving ability and competitive programming skills.

EDUCATION

Lovely Professional University Bachelor of Technology Computer Science and Engineering; CGPA: 6.71	Phagwara, Punjab Aug' 22 - Present
R.P.S College Intermediate PCM; Percentage: 65.6%	Patna, Bihar Apr'19 – Mar'21
Vidya Bharati Vidya Gram Matriculation Percentage: 62.2%	Sitamarhi, Bihar Apr'18 – Mar'19
